Artifacts

Table 1

- List all the artifacts this notebook is based on

	artifactName	packages	types
0	axon-eventsourcing-4.7.5.jar	9	130
1	axon-messaging-4.7.5.jar	61	729
2	axon-disruptor-4.7.5.jar	1	22
3	axon-test-4.7.5.jar	8	85
4	axon-configuration-4.7.5.jar	1	39
5	axon-modelling-4.7.5.jar	10	149

Cyclic Dependencies

Cyclic dependencies occur when one package uses a class of another package and vice versa. These dependencies can lead to a lot of trouble when one of these packages needs to be changed.

Table 2

- List packages with cyclic dependencies

	packageName	dependentPackageName	forwardToBackwardBalance	numberForward	numberBackward	
0	org.axonframework.queryhandling	org.axonframework.messaging.responsetypes	0.882353	16	1	[Qt

Interface Segregation Candidates

Well known from [Design Principles and Design Patterns by Robert C. Martin](#), the *Interface Segregation Principle* suggests that software components should have narrow, focused interfaces rather than large, general-purpose ones. The goal is to minimize the dependencies between components and increase modularity, flexibility, and maintainability.

Smaller, focused and purpose-driven interfaces

- make it easier to modify individual components without affecting the rest of the system.
- make it clearer which client is affected by which change.
- don't force their clients to depend on methods they don't need.
- reduce the scope of changes since a change to one component doesn't affect others.
- lead to a more loosely coupled architecture that is easier to understand and maintain.

How to apply the results

If just one method of a type is used, especially in many places, then the result of this method can be used to call e.g. a method or construct an object instead of using the whole object and then just calling that single method.

If there are a couple of methods that are used for a distinct purpose, those could be factored out into a separate interface. The original type can extended/implement the new interface so that there are no breaking changes. Then all the callers, that use only this group of methods, can be changed to the new interface.

Table 3

- List top 20 most used combinations of methods of larger Types that might benefit from *Interface Segregation*
