## Artifacts

Table 1

- List all the artifacts this notebook is based on

	artifactName	packages	types
0	axon-eventsourcing-4.8.0.jar	9	130
1	axon-disruptor-4.8.0.jar	1	22
2	axon-messaging-4.8.0.jar	64	762
3	axon-configuration-4.8.0.jar	1	39
4	axon-test-4.8.0.jar	8	87
5	axon-modelling-4.8.0.jar	10	150

## Cyclic Dependencies

Cyclic dependencies occur when one package uses a class of another package and vice versa. These dependencies can lead to a lot of trouble when one of these packages needs to be changed.

Table 2

- List packages with cyclic dependencies as an overview

	packageName	dependentPackageName	forwardToBackwardBalance	numberForward	numberBackward

## Interface Segregation Candidates

Well known from [Design Principles and Design Patterns by Robert C. Martin](#), the *Interface Segregation Principle* suggests that software components should have narrow, focused interfaces rather than large, general-purpose ones. The goal is to minimize the dependencies between components and increase modularity, flexibility, and maintainability.

Smaller, focused and purpose-driven interfaces

- make it easier to modify individual components without affecting the rest of the system.
- make it clearer which client is affected by which change.
- don't force their clients to depend on methods they don't need.
- reduce the scope of changes since a change to one component doesn't affect others.
- lead to a more loosely coupled architecture that is easier to understand and maintain.

## How to apply the results

If just one method of a type is used, especially in many places, then the result of this method can be used to call e.g. a method or construct an object instead of using the whole object and then just calling that single method.

If there are a couple of methods that are used for a distinct purpose, those could be factored out into a separate interface. The original type can extend/implement the new interface so that there are no breaking changes. Then all the callers, that use only this group of methods, can be changed to the new interface.

## Table 4

- List top 20 most used combinations of methods of larger Types that might benefit from *Interface Segregation*

	fullDependentTypeName	declaredMethods	calledMethodNames	calledMethods	callerTypes
0	org.axonframework.commandhandling.CommandMessage	9	[getCommandName]	1	18
